

Spring Creek Wasteway Turbidity Measurements
Irrigation Seasons 1997-2005

The Spring Creek Wasteway graph for the irrigation seasons from 1997 to 2005 are illustrated by a line graph with turbidity units ranging from 0 to 100 NTU. The irrigation years 1997 to 1999 have turbidity units mostly between 25 and 50 NTU. Since irrigation year 2000, most measurements have been below the goal of 25 NTU.
