

Sunnyside Valley Irrigation District

2009 Water Shut-Down Schedule

- October 12 Water will be turned off on the following laterals to allow piping work to start:
22.56, 40.20, 40.86, 51.36 and 59.28A
- October 18 Begin shut down of the main Sunnyside Canal.
Deliveries and laterals between the head gate and Granger will start to drop off.
- October 19 Continue shut down of main Sunnyside Canal.
Deliveries and laterals from Granger to Sunnyside will start to drop off.
- October 20 complete final shut down of the main Sunnyside Canal.
All other deliveries and laterals will start dropping off.

Beginning October 20, we will start draining the main Sunnyside Canal and all laterals and we will commence with closing off all deliveries. We anticipate all drainage activities to be complete by the end of October, although most will be drained out within a few days of final shut down.
