

PRESS RELEASE

Sunnyside Valley Irrigation District (SVID) will be turning off water to the Sunnyside Canal on **October 20th** of this year. Some laterals and deliveries, especially in the lower sections of the District, may have water for a few days beyond that date as the canal is draining and dewatering, but all consistent deliveries will end on October 20th.

The Rocky Ford and Matheson laterals, both in the Grandview area, will be shut down one week earlier this year to allow for work to commence on the enclosed piping of parts of those laterals. This shut down will be done on **October 13th**.
