

PRESS RELEASE

The Sunnyside Valley Irrigation District (SVID) will turn off laterals 51.18 and 51.87 on **October 12th**. This early shut down will allow for work to commence on this year's piping projects. SVID will be shutting down the Sunnyside Main Canal **October 18-20, 2020**. Some laterals and deliveries may have water for a few days beyond that date as the canal is draining and dewatering. If you have question as to whether you are affected by the early shut down. Please contact SVID at 837-6980.
