

PRESS RELEASE

The recommended shutoff date for SVID main canal will begin October 18th and will conclude on October 20th. Provided the weather is mild and we do not have allotment issues. If that occurs, shut off could be a few days earlier.

Due to tight construction schedule staff has recommended an early shutoff date of lateral 51.87 on Monday October 11th.

If you have question as to whether you are effected by the early shut down please contact SVID at 837-6980.
