

## SVID Press Release

---

SVID will begin shutting off the irrigation system on October 18, 2008; it will be a three day process. Irrigation will be available through part of the planned shut off process depending on a water user's location in the district.

Below is a list of the approximate time frames of when you can expect water delivery to cease by area. Water users may continue to utilize the water in the system as long as it is available. For deliveries using a pump, an **automatic shut off switch is highly recommended** to avoid damage to the pump when water levels drop in the canal.

Please note that those water users within city limits of **Zillah, Granger, Grandview, Prosser** or serviced by **Grandview Irrigation District or Benton Irrigation District** should contact them for their shut off date.

These dates are posted on the SVID webpage ([www.svid.org](http://www.svid.org)).

*Dewatering schedule – approximate date of shut off by areas:*

Zillah area and above	October 18
Granger area	October 19
Snipes and Outlook	October 19
Grandview and Mabton	October 19
Prosser	October 19
Whitstran	October 20
Shut down completed	October 22
